

SpaceTech • Aerospace • Series A

OrbitalInsight Analytics

Small-satellite and geospatial analytics platform that makes earth-observation data accessible for infrastructure, agriculture and insurance.

Funding Ask: US\$8M Series A

Target Investor Fit: SpaceTech Asia

MATCH SUMMARY

Industry	SpaceTech; Aerospace
Stage	Series A
Ticket	US\$8M
Customer	B2B, B2G
Target Fit	SpaceTech Asia

Geospatial intelligence is expensive and hard to operationalize

Even with the most advanced tools, it's difficult to derive insights from geospatial data. The main reasons are:

72h

imagery-to-insight delay

Traditional pipelines require manual preprocessing and GIS expertise.

6+

data vendors per workflow

Customers must stitch imagery, weather and ground data separately.

40%

higher loss-adjustment cost

Insurance and infrastructure teams lack timely evidence after events.

Problem focus aligned with SpaceTech Asia: "Dữ liệu vệ tinh đắt đỏ và khó tiếp cận".

Our Solution

Commercial geospatial data products powered by small-satellite ingestion and AI analytics.

- Unified ingestion layer for small satellites, public imagery and weather feeds.
- AI change-detection models convert pixels into alerts for flood, crop and infrastructure risks.
- API and dashboard deliver decision-ready geospatial events to enterprise systems.

Technology Focus

Small Satellites

Geospatial Data

Change Detection

Earth Observation API

Geospatial Intelligence Pipeline

From orbital data to operational decisions for B2B and B2G customers.

Data Ingestion

Small-satellite feeds, public imagery and weather data.

AI Analytics

Change detection, anomaly scoring and geospatial event classification.

Delivery Layer

API, dashboard and alert streams for enterprise workflows.

Turn complex satellite data into productized, decision-ready intelligence.

Market & Customer Focus

01

Insurance teams

Rapid evidence for flood, storm and crop-loss assessment.

02

Infrastructure operators

Monitor assets, vegetation encroachment and construction progress.

03

Public agencies

Track land-use change, disaster response and environmental indicators.

Customer focus exactly aligned with investor profile: B2B, B2G.

Business Model

Explorer

US\$2,500/mo

Dashboard, 3 regions, monthly refresh and basic alerts.

Operations

US\$9,000/mo

API access, near-real-time events and enterprise support.

Government

Custom

Multi-region monitoring, reporting, and procurement terms.

Revenue scales with monitored regions, refresh frequency and API event volume.

Traction & Validation

7

enterprise interviews

Insurance, infrastructure and agriculture operators.

3

data pipelines

Imagery, weather and geospatial boundary integration.

5

event detectors

Flooding, land-use change, crop stress and asset movement.

24h

target alert SLA

Near-real-time change-detection for monitored regions.

We are preparing Series A fundraising to scale commercial pilots and recurring geospatial data subscriptions.

Use of Funds

Funding Ask: US\$8M | Ticket fit: US\$3M - US\$15M

35% **Data partnerships**

25% **AI model development**

25% **Enterprise pilots**

15% **Compliance and sales**

Primary goal: expand data access, validate pilots and convert geospatial workflows into recurring subscriptions.

Why SpaceTech Asia

Target Industries

SpaceTech; Aerospace - OrbitalInsight Analytics operates in SpaceTech; Aerospace

Target Stage

Series A; Series B - current round is Series A

Ticket Size

US\$3M - US\$15M - funding ask is US\$8M

Technology Focus

Small Satellites; Geospatial Data - product architecture uses Small Satellites, Geospatial Data

Investment Thesis

Thương mại hóa không gian và dữ liệu quan sát trái đất. - OrbitalInsight commercializes earth-observation data through productized geospatial intelligence.

Data Extraction Summary

startup_name	OrbitalInsight Analytics
industry	SpaceTech; Aerospace
funding_stage	Series A
funding_amount_usd	8000000
target_customer	B2B, B2G
technology_focus	Small Satellites, Geospatial Data
problem_focus	Dữ liệu vệ tinh đắt đỏ và khó tiếp cận
business_model	Geospatial data subscription and API usage
investment_thesis_fit	OrbitalInsight commercializes earth-observation data through productized geospatial intelligence.
best_fit_investor	SpaceTech Asia

OrbitalInsight Analytics

Make satellite intelligence operational for every enterprise and agency.
